DEPI FINAL PROJECT

BANKING MANAGEMENT SYSTEM

Task Assignment & Peer Review Matrix

1. Team Overview & Core Responsibilities

Team Member	Role	Core Responsibilities
Somia Rashad	QA Lead & Test Automation Engineer	Test plan, comprehensive test cases, Jira board & bug tracking, Selenium WebDriver & Postman API automation suites; upfront static review of requirements.
Muhammad Sayyid	Tech Lead & Software Architect	System architecture, database setup, Spring Security configuration (auth & RBAC), transactions and concurrency control, scheduler, and mandatory PR reviews.
Aladdin Ahmed	Core Banking Logic	Account hierarchy (Savings, Checking, Fixed Deposit), domain business rules and constraints, domain unit testing with JUnit 5.
Asmaa Mohamed	Frontend & UI	User-facing Thymeleaf pages and responsive forms, stable element IDs for automation testing, input validations and error alert messages.
Aghapy Antonious	Backend Services & Admin	Customer profile management, paginated account statements with date filtering, CSV export pipeline, and admin management search and statistics.

2. Deliverable Assignment & Peer-Review Matrix

Deliverable Artifact / Module	Primary Owner	Secondary Reviewer	Milestone
Master Test Plan & RTM	Somia Rashad (QA Lead)	Muhammad Sayyid (Tech Lead)	**Week 2**
Architecture & Database Setup	Muhammad Sayyid (Tech Lead)	Aghapy Antonious (Backend Services)	**Week 2**
Security & Authentication Module	Muhammad Sayyid (Tech Lead)	Aladdin Ahmed (Core Logic)	**Week 3**
Core Account Domain & Logic	Aladdin Ahmed (Core Logic)	Somia Rashad (QA Lead)	**Week 4**
Front-End Interfaces & Stable IDs	Asmaa Mohamed (Frontend & UI)	Aghapy Antonious (Backend Services)	**Week 4**
Postman API Test Suite	Somia Rashad (QA Lead)	Aladdin Ahmed (Core Logic)	**Week 5**
Selenium UI Automated Suite	Somia Rashad (QA Lead)	Muhammad Sayyid (Tech Lead)	**Week 6**
Services, Admin & CSV Export	Aghapy Antonious (Backend Services)	Asmaa Mohamed (Frontend & UI)	**Week 6**
Final Demo Prep & Dry Run	All Team Members	Muhammad Sayyid & Somia Rashad	**Week 7-8**

3. Detailed Member Scope & Review Obligations

---

1. **Somia Rashad** — *QA Lead & Test Automation Engineer*

   Detailed Scope: Responsible for quality assurance end-to-end. Conducts static review of system requirements before development, writes the comprehensive Test Plan & Requirement Traceability Matrix (RTM), designs detailed test cases, oversees test automation using Selenium WebDriver and Postman API collections, and manages Jira for defect tracking, triaging, and reporting.

   Assigned Peer Reviews: Core Account Domain & Logic (Core Logic) and Final Demo Prep (co-lead).

2. **Muhammad Sayyid** — *Tech Lead & Software Architect*

   Detailed Scope: Oversees system architecture and technical decisions. Configures Spring Security (authentication, password hashing, role-based access control), implements financial transaction rules with atomic balance consistency and concurrency handling, manages scheduled background jobs, and conducts mandatory pull request (PR) reviews on GitHub.

   Assigned Peer Reviews: Master Test Plan & RTM (QA), Selenium UI Suite (QA), and Final Demo Prep (co-lead).

3. **Aladdin Ahmed** — *Developer 1 (Core Banking Logic Engineer)*

   Detailed Scope: Owns the core business domain model. Implements the object-oriented account hierarchy covering Savings, Checking, and Fixed Deposit accounts, enforces business policies and constraints per account type, and writes JUnit 5 unit tests for domain entities and calculations.

   Assigned Peer Reviews: Security & Authentication Module (Tech Lead) and Postman API Test Suite (QA).

4. **Asmaa Mohamed** — *Developer 2 (Frontend & UI Engineer)*

   Detailed Scope: Builds the user-facing web interface using Thymeleaf templates. Designs

responsive forms for registration, login, and banking operations, assigns unique, permanent HTML element IDs for test automation scripts, and binds field validation and error alert messages.

Assigned Peer Reviews: Services, Admin & CSV Export Pipeline (Backend Services).

5. **Aghapy Antonious** — *Developer 3 (Backend Services & Admin Module Engineer)*

   Detailed Scope: Develops customer and administration service modules. Implements customer profile management, paginated account statement generation with date filtering, CSV file export functionality, and admin management tools including customer search and financial statistics metrics.

   Assigned Peer Reviews: Architecture & Database Setup (Tech Lead) and Front-End Interfaces & Stable IDs (Frontend & UI).
